CYBER SECURITY SYMPOSIUM 3.0

Monday, May 15, 2017
9:00 a.m – 6:00 p.m.

Hazel McCallion Campus
4180 Duke of York Blvd. | Mississauga

Hosted by Sheridan College | Faculty of Applied Science and Technology in collaboration with Sheridan Applied Research & Innovation

This full-day symposium will explore cyber security within post-secondary education, public health & safety, community, and business.

As experts in cyber security, Sheridan's Honours Bachelor of Applied Information Sciences (Information Systems Security) professors work with leading edge technologies and industry knowledge to prepare students for a rapidly evolving cyber landscape. This symposium will provide the avenue to share that knowledge with the community, network with Industry experts, and connect with Sheridan students participating in the student cyber security contest.

Cyber Security Symposium 3.0 is bound to be standing-room-only, so register today at cybersecurity.sheridancollege.ca.

Lunch, parking and networking reception will be provided.

Sheridan offers a highly-specialized Bachelor of Applied Information Sciences (Information Systems Security) degree, which produces world-class Information Systems Security talent.

Early Bird registration (ends April 28): \$100

Registration after April 29: \$150

REGISTER NOW
